BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

**As rescanning documents *will not* correct images,
please do not report the images to the
Image Problems Mailbox.**

SERIAL NO.: 09/826,765

IN THE CLAIMS:

A complete listing of the claims and their status as of this Amendment is as follows:

1. (currently amended) A bottle carrier device, comprising:
a ~~hook member for attachment to a support~~ carabiner comprising a closable ring-like member having a pivoted arm in said ring-like member for opening and closing said ring-like member to provide single-handed detachable attachment of said carabiner to a support;
a ~~an elastomeric self-adjusting bottleneck-engaging ring member for attachment~~ having a low modulus of elasticity and having an internal diameter sized to be received about the neck of a bottle; and
a joining member having a first end secured to ~~about said elastomeric self-adjusting bottleneck-engaging ring member~~ and a second end secured ~~to said hook member about said ring-like structure of said carabiner~~ to Interconnect said hook member carabiner to said bottleneck-engaging ring member in close proximity to thereto in a manner to assure orientation of a bottle in a vertical vertically-upright position when secured by said elastomeric self-adjusting bottleneck-engaging ring member.

6. (Cancelled)

7. (Cancelled)

8.(currently amended) A bottle carrier device, comprising:
an elastomeric bottleneck-engaging ring member having a low modulus of elasticity and being sized to be positionable about the neck of a bottle;
a closable-loop ~~hook member~~ carabiner for attaching to a support; and
a joining member having a first end secured to said elastomeric bottleneck-engaging ring member and a second end secured to said ~~hook member~~ carabiner for attaching said elastomeric bottleneck-engaging ring member to said ~~hook member~~ carabiner in close proximity thereto and in a manner to assure vertical vertically-upright orientation of a bottle secured by said elastomeric bottleneck-engaging ring member..

9. (Cancelled)

10.(currently amended) The bottle carrier device of claim 9 ~~and~~ wherein said closable-loop ~~hook member is a~~ carabiner ~~comprising~~ comprises a ring ring-like

structure having a pivoted arm for opening and closing said ~~ring~~ ring-like structure.

11.(currently amended) The bottle carrier device of claim 8 10 wherein said joining member is a loop of material which encircles a portion of said ~~hook-member~~ carabiner and which also encircles a portion of said elastomeric bottleneck-engaging ring member.

12. (Cancelled)

13. (Cancelled)
